

## Installing Flip Mino Cameras – First Time Use

The first time you use the Flip Mino cameras the computer needs to install codecs (the files that Movie Maker uses to play back your clips).

To do this:

1. Plug in your Flip Mino Camera
2. Click on 'My Computer' and 'FLIPVIDEO E:'
3. Double click the 'Flip Video for PC.exe' program to install
4. Open Windows Movie Maker
5. Click on 'Tools' and 'Options'

5. Check 'Download codecs automatically'

6. Import your clips as explained on the other handout.
